Understanding of road user behaviour in **E**urope

PROLOGUE

Topics for Naturalistic Driving Research

Martin Winkelbauer

Questions

- § Is the matrix a good framework?
- § Which cells are most interesting?
- § Are the categories of behaviour and the condition categories complete or should some categories be joined?
- § What is the added value for VRU, driver training, accidentology...?
- § Are there specific topics for eco-driving/environmental issues and traffic management
- § If you have this desired knowledge from the large scale ND study, what would you do with it?
(new products, different policies ...)
- § Please provide some examples!

More Questions

- § What should we (the consortium) do to convince the EC to fund a large scale ND study?
- § What must we include in the recommendations (one issue per person)?

Thank you!
